

EuroFab
EURO-FAB (SCOTLAND) LTD

Euro-fab (Scotland) Ltd was originally founded in 1990 by William Macaloney & Gerry Fitzpatrick. Due to their previous experience in the Earthmoving Industry, this resulted in them being offered the opportunity to manufacture Excavator Bucket's under licence of ESCO UK Ltd, however due to the economic financial crash in 2008 they ceased trading having had 28 years successfully manufacturing Excavator attachments in Scotland.

Fast forwarding to 2016 where Derek Macaloney, William's son, resurrected the business and Euro-fab (Scotland) Ltd was reborn and to this day continues to go from strength to strength with the assistance of many of the original Euro-fab team as well as some new members, this would not have been possible without their input.

Derek Macaloney

Managing Director

As a Company we pride ourselves on our ability to design and produce various quality attachments, stock or bespoke items, offering a realistic timescale suitable for the customer with all new products accompanied by a minimum 12 month warranty.

A beneficial part of the business is our repair and alteration service which allows customer to retain their existing attachments but also allowing a quick reaction & turnaround should any issues arise.

Sourcing from UK Companies, purchasing reputable products, utilising various Steel Supplier's for Mild Steel, Abrasion Steel & Wearplate plate, K-MAX, Hensley's, ESCO & CAT gives us the confidence to produce a product we believe in and proud of.

GP Buckets

General Purpose Buckets are designed and manufactured to suit all machines from 8T to 125T.

HD Buckets
